About RCI Music Library
Software - Mac/Win

THE RCI MUSIC LIBRARIES, an award-winning computer software collection, are your solution for music organization and cataloging. Replace your traditional system with one that helps all organizing.

Check out www.riden.com

THE LIBRARY SOFTWARE:

- catalogs music and recordings
- creates lists by title, composer, arranger, seasonal emphasis
- tracks performances and music loans
- manages instruments, uniform/robes, fund-raising activities, membership lists, attendance/grades, percussion and more!

Individual programs are created for the specific needs of school **BAND**, **ORCHESTRA** and **CHORAL** directors, as well as **ELEMENTARY MUSIC TEACHERS**, **CHURCH CHORAL DIRECTORS** and **ORGANISTS**.

About the Tempowatch™

The Tempowatch™ tells you what the tempo is while you are conducting, teaching, listening or composing.

www.tempowatch.com

To know tempo as it happens is a constant need for every musician. The TEMPOWATCH fills this need precisely, quietly and quickly.

The TEMPOWATCH concept of tempo determination is, on the other hand, essentially the opposite to that of the metronome. Instead of giving you the tempo to take, it gives you the tempo you are taking or have taken, an infinitely more useful bit of information in almost all practical situations.

HERE'S HOW IT WORKS: counting in tempo, you start the TEMPOWATCH on the count of **ONE** and stop on exactly on **SEVEN**. Watch shows tempo immediately.

For example, a conductor may check his tempo at any time without interrupting the rehearsal. The sweep hand of the TEMPOWATCH indicates the tempo at a glance.

More technically, the TEMPOWATCH is provided with special dial divisions converting time into units on the basis of six full beats and allowing a direct reading of from 34 to 360 beats per minute. The reason for the six unit basis is that for the most common meters found in music the count of seven (which embraces the six full beats) is especially convenient. This provides the possibility of stopping and starting the TEMPOWATCH on strong metric beats.

Some of the many uses of the TEMPOWATCH may be readily envisioned in the following suggested situations:

- the conductor or composer at rehearsal or performance
- the composer or arranger marking a new score
- the private teacher during the lesson
- the student at practice
- the bandsman on the field
- the engineer in recording, TV, radio
- the choreographer at rehearsal
- the librarian or historian checking recordings
- the music director in the entertainment field

A very important advantage of the TEMPOWATCH is its applicability in measuring tempo *fluctuations* during performance. Although in much music fluctuation is not intended, in contemporary music, for instance, tempo fluctuation is increasingly important and must be controlled with precision. The TEMPOWATCH catches these fluctuations readily in either case, and this may be done several times per minute, if desired.

Another advantage of the TEMPOWATCH is its capability (and availability) in precisely identifying, on the spur of the moment, a tempo which in practice or performance proves to be particularly "right".

Developed by composer-inventor **CECIL EFFINGER**, it is a superior timepiece in aluminum case of modern design, seven jewel lever movement, anti-magnetic, shock resistant with unbreakable mainspring. It is produced in Germany by Hanhart, foremost maker of quality stopwatches.

The TEMPOWATCH comes with a special felt carrying case and is guaranteed for one year. Full refund less postage will be made if the TEMPOWATCH is returned in good condition within ten days.

 Boston Records, "the best CDs of Woodwind Chamber Music", has selected their CDs from the artists who are considered to be from 'the golden era; the right men in the right place at the right time - Daniel Bonade, William Kincaid, Leopold Stokowski, Marcel Tabuteau - they set standards by which orchestra players the world over are still judged.' Boston Records' CDs include performances by these original faculty artists of the Curtis Institute who we proudly call "the founders of the American School of Woodwinds", and continue to present performing artists who were directly or indirectly influenced by these unique super stars. Call or visit our website for complete information.

We want to help your group have your best Fund Raiser ever!

3 Reasons to Fund Raise with RADA

1. Products that Sell Themselves

Rada Mfg. Co. has been making incredible kitchen knives and utensils for 55 years. Our aluminum handle cutlery is visually unique and recognized as being remarkably sharp. All of our products are made in the USA and our cutlery has a Lifetime Guarantee.

We have over 50 individual kitchen knives and utensils plus more than 30 gift sets. You can also sell Rada Stoneware, Rada Soy Wax Candles and Recipe Books. *There is something for everyone!*

2. Prices and Profit

Unlike many fundraisers, your customers get a great deal on the items they buy! This is possible because you work directly with the manufacturer. People appreciate being able to support a worthy cause while getting a great value on products they want.

Your group will earn an average profit margin of 40% on sales. Equally important to profit is how easy items sell. Pamela from Arkansas says: *"Another church group from a different part of our state has used your fundraising program with great success and we would like to try it also! They said your knives sell themselves!"*

3. System and Service

Our focus is you. We know that you are volunteering your time so we have developed a system that makes it easy for you. We provide you with a guide that has pointers on how to run your fund raiser. We offer posters, fliers and other promotional materials. The combination catalog and order taker makes it easy for your sales people to take orders. Each individual knife is covered with a blade sleeve, bagged and marked - ready for delivery! Our goal is for you to have a positive experience!

Everything is always in inventory! We ship out 99% of our orders within 48 hours of receipt!
